Drawing dimensions in inches.

Tilt switches "make" when the electrode is tilted below horizontal and "break" when tilted above the horizontal. Total travel from "make" to "break" is the "Maximum included angle" shown below. The component to which the switch is attached must have a total tilt angle greater than the "Maximum included angle" for proper operation.

Must Break Angle * :	+ 0.7°
Maximum included Angle:	1.4°
	* Make/break angles are electrode + (above) / - (below) 0° horizontal reference
